

Red Engine

Can I add my logo to the red engine?

We have two different types of red engines API's.

1. With custom logo and back end for reports and viewing there is a set up cost of \$10,000
2. Take the current system with no logo, no reporting we can waive the set up fee.

Keep in mind, regardless of which option you choose the engine is still located within your members area and the end user still thinks you are powering it.

Unique solution ID: #1003
